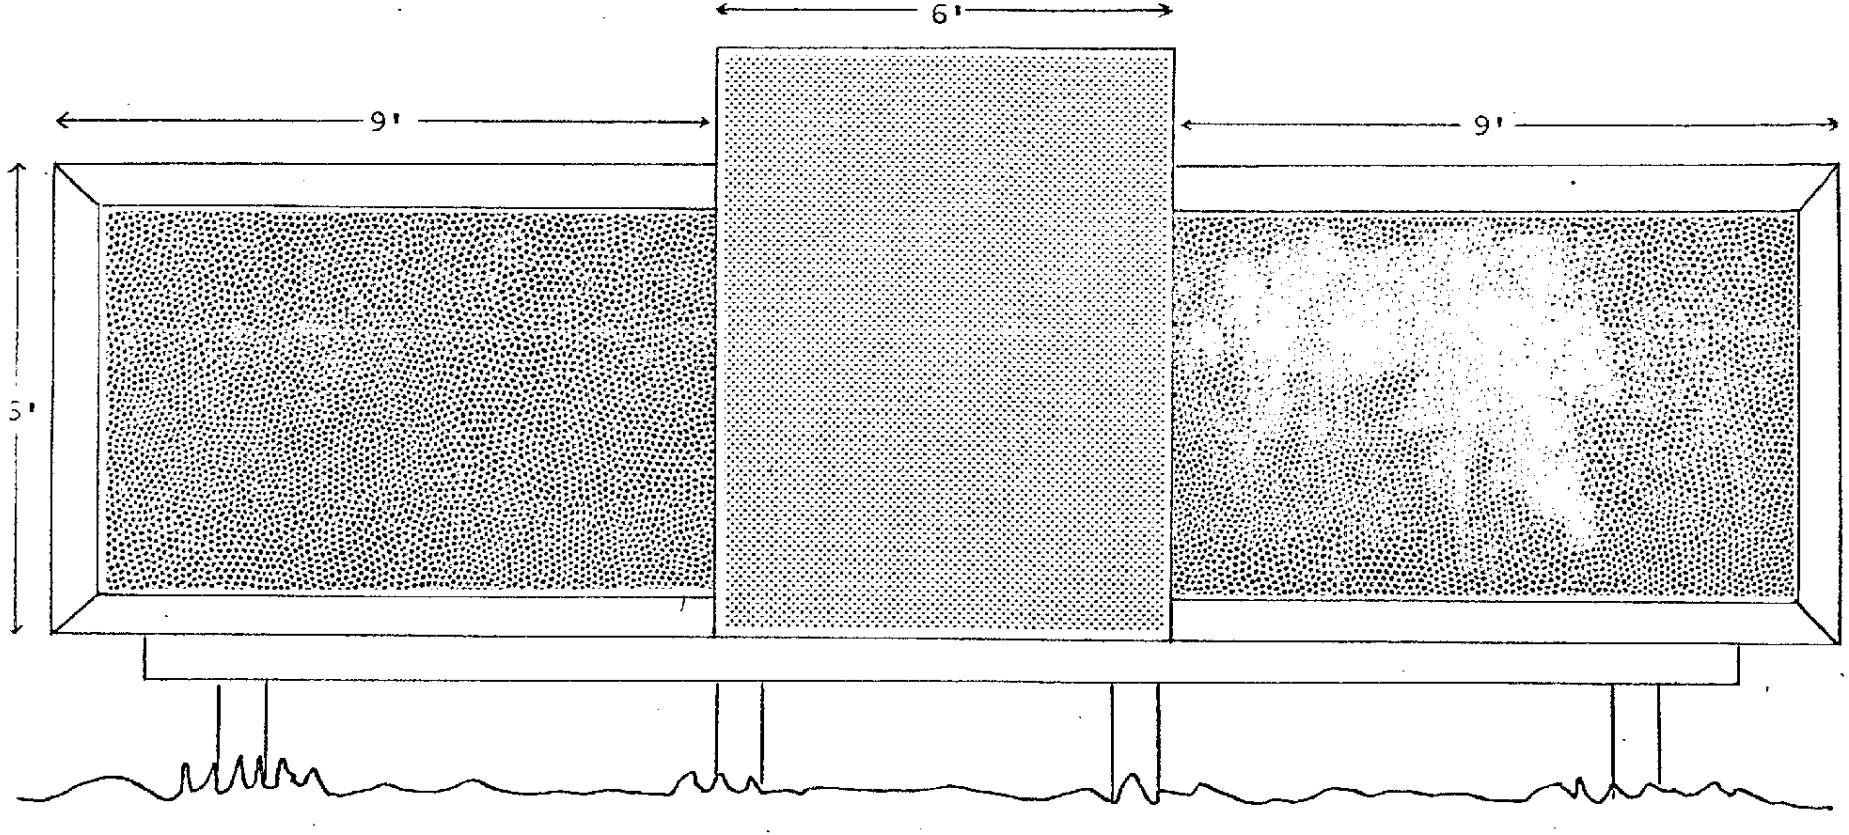
Outdoor 6 Sheet fill



NOTE: Both panels are standard Junior Panels - 6' high by 12' long. If the ends of the panels are butted together, this would mean covering the 3' section of each panel behind the placque, thus leaving the clear 9' space of each panel, as indicated. If there is a definite separation between the two panels, then the visible portion of each Junior Panel would be greater than the 9' shown above.
